Members Present:
Michael Chabiny, Ron Cortez, Paolo Gardinali, Steffen Gauglitz, Michael Hewitt, Bruce Kendall, Mel Manalis, Joel Michaelsen, Evanne St. Charles, Bruce Tiffney

Advisors/Consultants Present: Marc Fisher, George Foulsham, Mo Lovegreen,

Members Absent:
Ingrid Banks, John Bowers, Diana Dyste, Alan Heeger, Walter Kohn, Britt Ortiz, Constance Penley, Jill Richardson

- Minutes from April 30 meeting approved.

Announcements:
- Bruce said that the budget our committee had established went up to the Chancellor and that he passed it on to Todd Lee. Bruce and Ron will be meeting with Todd next week to review the budget and it may take a few weeks to get things moving forward on it. Joel mentioned that with the budget in such a state of flux it may take longer than a few weeks to get any resolution on it.
- Ron and Bruce said they would be meeting with Tam Hunt and John Stahl about a PV project on campus in the next week or so. He said he would be sure to invite Marc Fisher and Mel Menalis as well.
- The sustainability survey is out now and the MSO survey will go out on Monday. For the Transportation Survey Paolo included 3,500 undergraduates, 1,000 graduates, 2,000 staff, and ~300 faculty in the sample pool.

Presentation:
- Amorette Getty presented her efforts to modify the behavior of fume hood users - one aspect of her energy conservation program in the engineering buildings (presentation on white board). Her results from ESB showed a 24% reduction in fume hood sash height in a three month time-frame. She included a number of other results within her presentation, but is still in the process of gathering data on the ~22 hoods within CNSI and will have more data on that later. The first set of results is really good, but she found that there were a few issues that needed FM attention in order to be resolved (a few sashes/HVAC systems need tweaking in order for the groups to be able to have low sash height and have it all work properly). Bruce would like to have her present the results of other projects at a later meeting (perhaps one of the first meetings next fall). Amorette has been invited to make a number of presentations in Europe based on the behavioral work she has been doing in the labs this year.

- Paolo Gardinali presented his results on the transportation survey (presentation on white board). Committee members had a few questions, eliciting the following answers: 1) On his slide with the Transportation Alternatives, "why not" was to see if he could sort the survey by faculty/staff/undergrad/grad (FSUG) to see what the trends for not using public transportation were in each group. 2) On his Transportation Alternatives "incentives" slide, yes, this could this be broken down by day to see if there were different trends depending on which day of the week it was. This might allow us to develop different parking sticker options that would create to use alternative transportation modes on various days of the week. Marc Fisher thought that we should also look at the Zip Car option (have more cars available) as it could provide an answer to all the folks that said they needed a car option for errands/appointments and get them
out of the single occupant vehicles. 3) The result of greatest concern was that the staff had the longest distance commute, had the oldest cars, and also needed to have the flexibility of having a car for errands/family pick-up and drop-off issues. This group had the biggest GHG impact from SOV's.

Discussion:
- n/a

Actions:
- n/a

- Meeting adjourned at 2:30 p.m.

Actions/ Tasks:
- Review list of accomplishments and bring any additions/changes to next meeting (All).
- Review MarBorg contract (All).

Next Meeting:
- Friday, May 28 @ 1:30 in Cheadle, 5123
- Presentation by Mel - growth and its impact on the environment
- Vote on MarBorg Contract
- Discuss accomplishments and goals for next year
- Visit by Mayor Helene Schneider
- Suggestions?
