

# Here's a bright idea...

Do you have overhead lights on in your office or lab that you don't need?

Everyone's comfort level of lighting is different. If there are lights in your workspace that just aren't needed, or already burned out, then the FM "relampers" can take out the bulbs. Just let us know or call 2661,4, and we will remove them. This will save energy, greenhouse gases and money for UCSB. At 60 watts each, this will save about \$20 a year per fixture.

Once they have been taken out, we will tag them so people know they were intentionally removed. You can have them reinstalled whenever you like by calling Facilities Management at ext. 2661.

Please identify fixtures you wish to be bulb free and leave this form in the room for the relampers: Room # \_\_\_\_\_
