

FREE Mercury Thermometer Exchange

Environmental Health and Safety (EH&S) and the Laboratory Research and Technical Staff Program (LabRATS) is sponsoring a Laboratory Mercury Thermometer Exchange with the goal of:

- ◆ Reducing the environmental and health risks of mercury pollution in the laboratory and beyond
- ◆ Reducing the time and money spent cleaning up broken mercury thermometers

To receive new spirit filled thermometers for your lab, please fill out the following form and FAX it to (805) 893-8659, attn: Bruce Carter. You can also contact Bruce by phone at (805) 893-3293.

In order to reduce the amount of mercury thermometers used on campus, the exchange is one for one—we will give you one new (Easy-Read Partial Immersion –20 to 150 degree C) thermometer for every one, unbroken mercury thermometer you turn in to EH&S to be recycled.

For more information on the exchange and the thermometers we are providing visit: (www.sustainability.ucsb.edu/LARS/mercurythermometer).
